## Relevant Work Experience

---

### Software Developer

Daimler Trucking North America, Portland, OR September 2018 – Current

- Working on the team in charge of Salesforce for DTNA
- Used Python with Pandas for data migration and analysis, including identifying potential duplicates in over 100,000 accounts based on fuzzy matching for name and address
- Created a variety of web components with JavaScript and CSS
- Worked on controllers, triggers, and more using Apex and SOQL, including Single Sign-On Just-In-Time Provisioning which creates/updates a variety of interrelated data when users sign in
- Wrote test classes to ensure proper functionality for Apex classes
- Code review for both my team and other teams

### Web Development Intern

Home Depot QuoteCenter, Vancouver, WA June 2017 – Aug. 2017

- Used JavaScript with React and Redux along with SCSS to make a website mobile friendly
- Wrote integration tests using Selenium and unit tests using Enzyme and Mocha

## Other

---

### Awarded 1st place in the Intel NUC Challenge

Intel Corporation, Hillsboro, OR May 2015

- Created an innovative, real-world project using the Intel NUC and won \$3,000
- Team placed 1st out of 10 finalists

## Education

---

### Bachelor of Computer Science with minor in Mathematics

Washington State University 3.47 GPA May 2018

- Vancouver Academic Achievement Award - \$4000 annually
